

Results (all countries)
of the survey on
knowledges and attitudes on democracy

carried out as part of the project
“Learning Democracy by school”

technical implementation and evaluation
by Bildungswerk für Schülervertretung und
Schülerbeteiligung e.V.

Facts about the survey

- in total, 244 persons participated in the survey, consisting of:
 - 36 participants from Chiaravalle
 - 163 participants from Treuenbrietzen
 - 45 participants from Złotoryja
- the participants were split up into three different roles:
 - *Representatives* (16 persons in total)
 - *Teachers* (33 persons in total)
 - *Students* (195 persons in total)
- all age groups of students from 12 to 19 years were almost equally represented

Interesting insights in the evaluation

- in total, the majority of the participants seems to have a general overview of democracy and the different political systems
- many of them regularly inform themselves about political happenings
- most cannot imagine to run for an office themselves
- some specific results were noticeable; in these cases there is an extra slide that highlights the noticeable result

Detailed depiction of all results (on the following pages of the presentation)
